ROUND INFINITY

FOR UNIVERSITIES, SCHOOLS AND TRAINING PROVIDERS

Move your admissions to agentic.

AI agents answer every enquiry, read every application and flag every at-risk student. Your admissions and advising teams decide.

01 **Every enquiry answered in minutes**

02 **Applications complete before review**

03 **At-risk students caught early**

From manual to agentic.

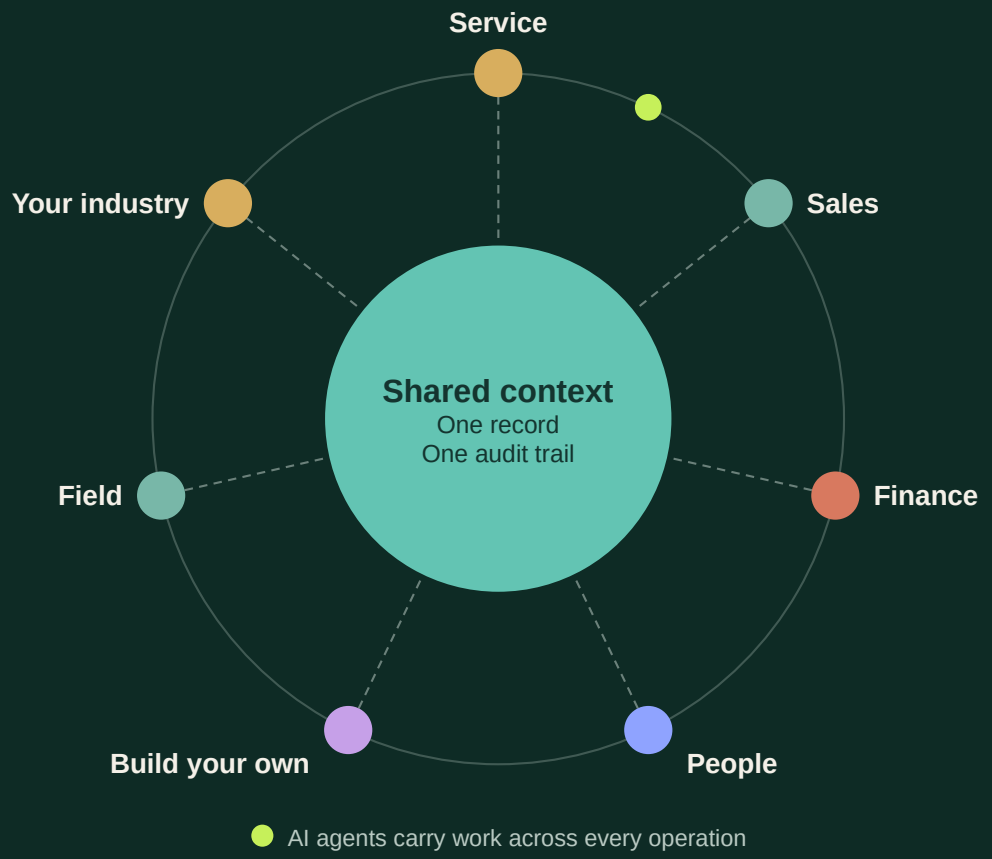

TODAY		WITH ROUND INFINITY
Enquiries wait until office hours	→	Answered 24/7 on web, WhatsApp and phone, in their language
Transcripts keyed in by hand	→	Documents read, extracted and checked for completeness
Readers start every file from scratch	→	Each application summarized against program criteria
Dropout risk spotted after the fact	→	At-risk students flagged early from attendance, grades and fees

Every operation on one shared context.

Your industry's workflows and your core operations run on one shared context. An agent that picks up a task sees every customer, case, contract and payment it touches, and acts across your systems.

One record	Customers, documents and decisions stay connected.
One audit trail	Every action, by an agent or a person, is recorded.
AI agents that act	They prepare, decide within limits and hand off.
People in control	Approvals sit where judgment matters.

One student journey, end to end.

Five steps. Pack apps hold the work, AI agents do it, people decide, and a Round Infinity use case completes each step.
