ROUND INFINITY

FOR CONTRACTORS, INFRASTRUCTURE OPERATORS AND EPC TEAMS

Move your projects to agentic.

AI agents turn site logs into action, chase every RFI and evidence every variation. Your project and commercial teams approve what matters.

01 **Site logs that raise their own tasks**

02 **RFIs answered inside contract time**

03 **Variations backed by evidence**

Round Infinity, Inc.

From manual to agentic.

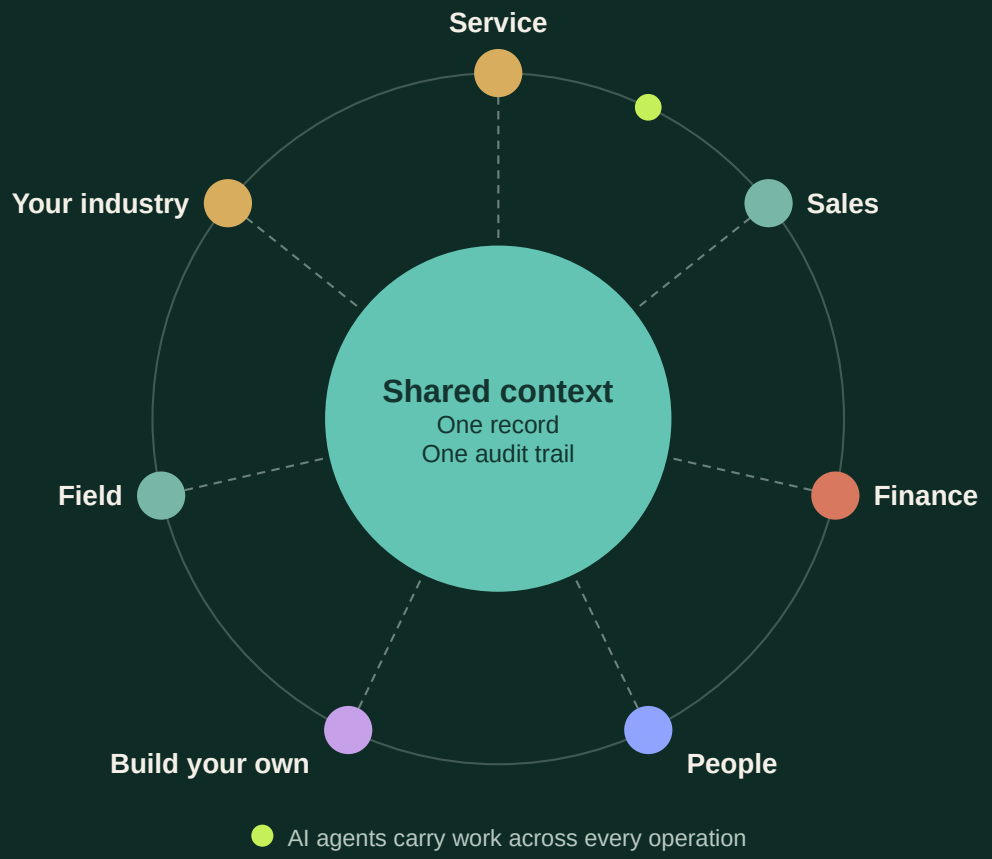

TODAY		WITH ROUND INFINITY
Site diaries bury delays and safety issues	→	Logs become tasks, notices and risks the same day
RFIs wait for someone to chase consultants	→	RFIs drafted with references; overdue replies chased
Crews start before paperwork is checked	→	Non-compliant subcontractors blocked before they start
Variation evidence rebuilt at claim time	→	Evidence captured as it happens; notices drafted for review

Every operation on one shared context.

Your industry's workflows and your core operations run on one shared context. An agent that picks up a task sees every customer, case, contract and payment it touches, and acts across your systems.

One record	Customers, documents and decisions stay connected.
One audit trail	Every action, by an agent or a person, is recorded.
AI agents that act	They prepare, decide within limits and hand off.
People in control	Approvals sit where judgment matters.

One project journey, end to end.

Five steps. Pack apps hold the work, AI agents do it, people decide, and a Round Infinity use case completes each step.
